

# Perpetual Wholesale International Share Fund

International shares

## Objective

Aims to provide long-term capital growth through investment quality global shares and outperform the MSCI World Net Total Return Index (\$A) (before fees and taxes) over rolling three-year periods.

## Investment approach

The manager adopts a 'bottom-up' stock selection approach to investing, where the decision to buy or sell is based on fundamental quality and valuation. The manager constructs a portfolio within a framework that is benchmark independent in terms of stock and sector weights. Currency hedging can be used with the aim of protecting the value of the fund's assets. Derivatives may be used in managing the fund.
