Investment objective

The fund aims to seek capital appreciation over the longer term by investing in a concentrated portfolio of global shares and aims to outperform the MSCI World Index (with net dividends before fees) in AUD over a full market cycle, before taking into account investment fees and expenses, and tax.

Investment approach

The manager believes that companies with sustainable above-average growth and returns, and whose prospects are not reflected in their valuation, will outperform over the long run. The value of compounding high returns on capital and above-average growth rates over long time periods is often underestimated by the market. Through fundamental analysis, the managers seeks to identify enduring businesses, focusing on operational risks and the long-term potential for change. The manager considers whether the valuation reflects the long-term growth and returns of the company, and to what extent it adequately incorporates risk.
