Investment objective

Aims to provide long-term capital growth through investment in quality global shares and outperform the MSCI World Net Total Return Index (\$A) (before fees and taxes) over rolling three-year periods.

Investment approach

The manager aims to select the most attractive securities to construct a well diversified, high active share portfolio that provides asymmetrical returns by participating in up markets while protecting in down markets. The portfolio will exhibit a clear value bias and seek characteristics such as 1) price/earnings ratios below the market, 2) price/book ratios below the market, 3) enterprise value/free cash flow ratios below the market and 4) dividend yields above the market.

The manager will primarily invest in companies incorporated in developed markets and may hold up to 20% of the portfolio in companies incorporated in emerging markets. The portfolio has no direct tobacco stock exposure. The currency exposure is unhedged.
