Investment objective

To deliver an investment return of 5% p.a. before fees and taxes above Australian inflation over rolling 3-year periods while minimising the incidence and size of negative returns in doing so. Inflation is defined as the RBA's Trimmed Mean, as published by the Australian Bureau of Statistics.

Investment approach

The manager's approach to inflation plus (or real return) investing is to choose the portfolio that has the highest probability of achieving the required return objective over the investment horizon with the least expected variability around this objective. The fund employs an objective based asset allocation framework in which both asset market risk premium, and consequently, the asset allocation of the portfolio are constantly reviewed. The portfolio will reflect those assets that in combination are most closely aligned to the delivery of the objective.

About the investment manager

Schroders is one of the largest and most internationally diverse independent investment managers providing investment management, research and marketing services from offices located in 29 countries across Europe, the Americas, Asia and the Middle East. Schroders in Australia was established in 1961 and its domestic research and investment teams are an integral part of Schroders global network. As at 31 December 2018 Schroders managed over AU \$790 billion on behalf of clients around the globe, and over AU \$37 billion on behalf of clients domestically.
