Investment objective

To provide an income yield above the S&P/ASX 200 Franking Credit Adjusted Annual Total Return Index (before fees and taxes) and to grow this income above the rate of inflation.

Investment approach

In selecting stocks, the manager focuses on long term normalised earnings and sustainable dividends of high-quality Australian companies to deliver an attractive and growing income stream. The fund aims to hold investments so that: exposure to an individual stock is no more than 6% of the portfolio; approximately 40 to 60 securities are held; and exposure to an individual sector (as determined by the manager) is no more than 22%. The fund will not invest in securities issued by companies involved in: the production or distribution of cluster munitions; or the manufacture of tobacco products. The fund does not use derivatives and does not intend to borrow.
