## Investment objective

Aims to achieve long-term capital growth and income. The fund aims to achieve long-term returns above the MSCI World Accumulation Index (AUD) (before fees and tax) and minimise the risk of permanent capital loss.

## Investment approach

The fund invests primarily in companies listed on recognised global exchanges and will also have some exposure to cash. Typically, the fund is highly concentrated with 15-30 stocks. The manager's strategy uses rigorous and in-depth quantitative and qualitative analysis to establish a unique portfolio. The fund invests in growth-oriented companies which pass the manager's rigorous investment process.

## About the investment manager

Hyperion Asset Management (Hyperion) was established in 1996 and manages approximately \$6 billion for industry and public funds as well as for many private investors. Its mindset is centred on achieving attractive long-term absolute positive real (inflation adjusted) returns on its clients' portfolios.

Its investment philosophy and process are designed to compound its clients' capital at rates of return that are not only positive in absolute (inflation adjusted) terms but also materially above the relevant passive benchmarks over long time horizons. Compounding returns on capital are core to how it invests and how it seeks to grow its clients' capital.

## Performance (after tax and fees)<sup>2</sup>

This is a new portfolio which commenced on 28 April 2021, therefore there is no meaningful performance history.

## Notes

- Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect investment costs as a percentage of the total average assets of the investment option based on latest information available but excludes indirect transaction and operational costs. The investment fees and costs exclude any investment performance-based fee that may be charged or incurred by the investment manager.
- Past performance is not an indicator of future performance.
