Investment objective

Aims to outperform the benchmark (before fees and tax) over 3-year periods. The manager aims to achieve this by actively managing the fund. This includes changing the fund's asset allocation to reduce risk if market risk is high. As a result, there may be smaller losses than the benchmark in weak or falling markets and potentially lower returns than the benchmark in strong markets.

Investment approach

The benchmark asset allocation has an approximately equal exposure to growth and defensive assets. The manager actively looks for opportunities to provide better returns, or less risk, than those generated by the benchmark asset allocation and to manage the fund's exposure to the risks of investing in markets.

About the investment manager

MLC has been looking after the investment needs for generations of Australians. MLC believes the best way to manage portfolios is to employ the skills of multiple specialist investment managers. MLC's investment experts have extensive knowledge and experience at designing and managing portfolios using a multi-manager investment approach.
