Investment objective

Aims to outperform the Reserve Bank of Australia Cash Rate after investment fees but before tax over the medium term.

Investment approach

The fund is an absolute return fixed income strategy that actively invests across the broad and diverse fixed income opportunity set. It seeks to deliver income via a diversified set of return sources, targets low levels of capital volatility with a focus on minimising drawdowns, and offers daily liquidity.

The fund diversifies its exposures across geography, issuer type, maturity, ratings grade and capital structure dimensions. Allocations to these dimensions are supplemented by duration management, currency management and alpha strategies. Risk management is crucial to control the fund's exposure to the aggregation of portfolio risks, in particular to limit correlation to equity markets and to minimise volatility and drawdowns.

About the investment manager

Schroders is one of the largest and most internationally diverse independent investment managers providing investment management, research and marketing services from offices located in 29 countries across Europe, the Americas, Asia and the Middle East. Schroders in Australia was established in 1961 and its domestic research and investment teams are an integral part of Schroders global network. As at 30 September 2020 Schroders managed over A\$967 billion on behalf of clients around the globe, and over A\$33 billion on behalf of clients domestically.
