## Recent Investment management history

The name of this investment option changed to Schroder Real Return Fund effective 1 March 2021.

Investment manager changed from AMP Capital to Schroders on 17 December 2019.

## Notes

- Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect investment costs as a percentage of the total average assets of the investment option based on latest available information, but excludes indirect transaction and operational costs.
- Past performance is not an indicator of future performance.
- The administration fee is deducted directly from the investment option before unit prices are declared.

## Investment objective

To achieve a return of CPI plus 4% to 5% p.a. (before fees and tax) over rolling 3-year periods while minimising the incidence and size of negative returns in doing so. CPI is defined as the Reserve Bank of Australia's Trimmed Mean, as published by the Australian Bureau of Statistics.

## Investment approach

The manager's approach to inflation plus (or real return) investing is to choose the portfolio that has the highest probability of achieving the required return objective over the investment horizon with the least expected variability around this objective. The fund employs an objective based asset allocation framework in which both asset market risk premium, and consequently the asset allocation of the portfolio are constantly reviewed. The portfolio will reflect those assets that in combination are most closely aligned to the delivery of the objective.

## About the investment manager
