Suggested minimum investment period	7 Years
Risk level	6 - High
Underlying strategy	FSF0908AU

Investment objective

Aims to deliver superior investment performance by taking a long-term investment view and integrating sustainability research within a rigorous fundamental equity analysis framework. The fund aims to outperform the MSCI World (ex Australia) Index over rolling three-year periods before fees and taxes.

Investment approach

The fund's strategy is to invest in high quality businesses, whose securities are attractively priced, with strong management teams that are capable of delivering superior long-term returns. Sustainable investing is the explicit recognition that economic, health, environmental, social and governance factors directly affect long-term business profitability. Whilst hedging may be used to manage currency exposures against the relevant benchmark, overall currency exposure will not be hedged back into Australian dollars.

About the investment manager

Generation Investment Management LLP (Generation) is a global equities manager that integrates long-term sustainability trends into traditional investment processes. Generation believes that sustainability factors (including environmental, social and governance criteria) will drive a company's returns over the long term, so the team combines sustainability research and fundamental equity analysis to build portfolios comprised of high-quality companies that will be able to maintain their profitability and deliver returns throughout prolonged periods of global change.

Based in London, Generation is an independent, owner-managed partnership that was founded in 2004 by seven partners including Chairman AI Gore and Senior Partner David Blood. The investment team have over 190 years of combined investment experience and manage over USD\$36bn as at September 2021.

Performance² (after tax and fees)

This is a new portfolio which commenced on 20 April 2022, therefore there is no meaningful performance history.

Notes

¹ Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect costs as a percentage of the total average assets of the investment option based on the latest information available, but excludes indirect transaction and operational costs.

² Past performance is not an indicator of future performance.
