Notes

- ¹ Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect costs as a percentage of the total average assets of the investment option based on the latest information available, but excludes indirect transaction and operational costs.
- ² Past performance is not an indicator of future performance.
- ³ The administration fee is deducted directly from the investment option before unit prices are declared.

Investment objective

To achieve a moderate amount of capital growth along with some income, by investing in a diversified portfolio of growth and defensive asset classes

Investment approach

An actively managed diversified portfolio of securities across both growth asset classes such as Australian equities, property and global securities, and defensive asset classes such as cash and fixed interest securities. In general, the portfolio's long-term average exposure will be around 50% growth assets and around 50% defensive assets; however the allocations will be actively managed within the allowable ranges depending on market conditions.

About the investment manager

Morningstar is a leading provider of investment management, asset allocation, portfolio construction and investment research services with over 35 years' experience in the United States, Australia and other international markets. Morningstar advises on, and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Morningstar's disciplined investment approach delivers objective, cost-effective and holistic solutions for our clients – helping them reach their financial goals. This long-term, valuation-driven approach is underpinned by an emphasis on preserving capital and undertaking fundamental analysis of global asset classes and securities.
