## Investment objective

Aims to outperform the benchmark, before fees and tax, over 7-year periods. The manager aims to achieve this return while keeping volatility (movements up and down in value) at levels similar to the benchmark.

## Investment approach

The benchmark asset allocation is invested in growth assets with minimal exposure to defensive assets. The manager actively looks for opportunities to provide better returns, or less risk, than those generated by the benchmark asset allocation and to manage the fund's exposure to the risks of investing in markets.

## About the investment manager

MLC has been looking after the investment needs for generations of Australians. MLC believes the best way to manage portfolios is to employ the skills of multiple specialist investment managers. MLC's investment experts have extensive knowledge and experience at designing and managing portfolios using a multi-manager investment approach.
