Investment objective

Aims to deliver capital growth by investing directly or indirectly in equities of companies that are quoted in or operating in one or more countries deemed to be emerging markets. The fund aims to generate after investment fee but before tax returns in excess of the MSCI Emerging Markets Index expressed in Australian dollars over rolling five-year periods.

Investment approach

The manager seeks to exploit market inefficiencies through rigorous fundamental research and by investing with a patient, long-term mindset. The manager seeks to add further value by investing in quality companies that exhibit the strongest growth characteristics, trading at a reasonable valuation. This philosophy is expressed through a high conviction, stock-driven portfolio with diversified market and sector exposure. The fund typically holds between 40-60 stocks. The fund may use certain derivatives to implement investment decisions, to manage cash flows or to facilitate timely exposure to emerging markets.
