Investment objective

Aims to provide a return higher than the investment manager's benchmark (before fees and tax) over 5-year periods by investing in a diversified portfolio of growth and defensive assets.

Investment approach

The portfolio is actively managed which includes reducing risk in the portfolio if market risk is high. The benchmark asset allocation has a strong bias to growth assets and some exposure to defensive assets. The investment manager actively looks for opportunities to provide better returns, or less risk, than those generated by the investment manager's benchmark asset allocation and to manage the portfolio's exposure to the risks of investing in markets.

About the investment manager

MLC has been looking after the investment needs for generations of Australians. MLC believes the best way to manage portfolios is to employ the skills of multiple specialist investment managers. MLC's investment experts have extensive knowledge and experience at designing and managing portfolios using a multi-manager investment approach.
