## Recent investment management history

The investment option's current investment manager was appointed on 23 May 2007.

## Investment objective

Aims to perform in line with the Bloomberg AusBond Bank Bill Index<sup>2</sup> over the short term (before fees and tax) using a low risk investment strategy.

## Investment approach

The fund may hold up to 10% in its cash account with the balance invested with the manager. The manager's cash management approach is driven by disciplined and thorough processes, and backed by in-house quantitative analysis. To take advantage of movements in market interest rates, the maturity profile of the fund is actively managed. After determining the maturity profile, the manager uses a number of analytical tools to select the securities that it believes offer the best value and to find the most appropriate yield curve position.

## About the investment manager

Macquarie Investment Management Global Limited, forms part of the Macquarie Group's investment management business, Macquarie Investment Management. Macquarie Investment Management delivers a full-service offering across a range of asset classes including fixed interest, listed equities (domestic and international) and infrastructure securities to both institutional and retail clients in Australia and the US, with selective offerings in other regions.
