## Investment objective

The fund aims to achieve long-term returns above the MSCI World Accumulation Index (AUD) (before fees and tax) and minimise the risk of permanent capital loss.

## Investment approach

The fund invests primarily in the equity of companies listed on members of the World of Federation of Exchanges or the Federation of European Securities Exchanges and will also have some exposure to cash. Typically, the fund is highly concentrated with 15-30 stocks. The manager's strategy uses rigorous and in-depth quantitative and qualitative analysis to establish a unique portfolio. The fund invests in growth-oriented companies which pass the manager's rigorous investment process.

## About the investment manager

Hyperion Asset Management Limited (Hyperion) is a high conviction growth style manager that specialises in identifying and investing in high quality Australian and Global equities. Hyperion's proprietary investment process aims to produce a relatively concentrated portfolio of high-quality companies with predictable long-term earnings streams and superior growth potential. Hyperion buys what it believes to be the highest quality growth businesses at an attractive valuation based on a thoroughly researched long-term view. Hyperion exploits other market participants' focus on the short-term, market sentiment and indices biases because Hyperion thinks and acts more like a business owner, rather than a share trader. The same team that developed Hyperion's proprietary investment process are shareholders in the company as well as having substantial personal investments in Hyperion's managed products. The result is that clients can feel confident Hyperion's objectives are fully aligned with theirs. As of 31 December 2024, the firm managed approximately A\$17 billion on behalf of its institutional and retail clients.

## Notes

- Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect costs as a percentage of the total average assets of the investment option based on latest available information, but excludes investment performance fee costs that may be charged or incurred by the investment manager and exclude indirect transaction and operational costs (refer to the Product Disclosure Statement for further information about fees and costs).
- Past performance is not an indicator of future performance.
- The administration fee is deducted directly from the investment option before unit prices are declared.
