² Past performance is not an indicator of future performance.

³ The administration fee is deducted directly from the investment option before unit prices are declared.

Investment objective

Aims to provide a growing income stream by investing in a diversified portfolio of listed real asset securities (such as A-REITs, infrastructure and utilities) characterised by established physical assets with recurring cash flows.

Investment approach

The manager's approach is premised on the philosophy that high-quality listed real assets can sustain dividends, match rises in the cost of living and are likely to be less volatile than the wider equity market. The manager relies on complementary fundamental and quantitative research, and collective insights into the current investment landscape, to identify the most attractive opportunities. The fund aims to hold approximately 35 securities.
