Investment objective

To achieve long-term capital appreciation by investing in companies which contribute to, and benefit from, sustainable development. The Fund aims to exceed the MSCI All Country World Index (before fees and taxes) over rolling five-year periods.

Investment approach

The fund is actively managed and the benchmark is not used to limit or constrain how the fund's portfolio is constructed. The fund aims to achieve its investment objective by investing in a diversified portfolio of equity or equity-related securities of companies which are listed in, traded or dealt on any of the regulated markets worldwide. The manager undertakes a bottom-up and qualitative approach to identifying, analysing and investing in companies, which it believes can deliver long-term positive financial returns and also contribute to, and benefit from, sustainable development. The manager considers a company contributes to, and benefits from, sustainable development if its activities lead to positive social outcomes and may lead to positive environmental outcomes. The fund does not hedge currency risk.
