Recent Investment management history

Investment objective

Aims to provide investment returns before fees, taxes and other costs which track the performance of the MSCI World ex Australia Quality Index in Australian dollars.

Investment approach

The fund invests in a portfolio of quality growth stocks selected from the parent index, MSCI World ex Australia Index, by identifying stocks with a high quality score based on three fundamental variables: return on equity, earnings variability, and debt to equity ratio. Derivatives may be used by the fund in extraordinary circumstances to gain market exposure without investing directly in underlying securities in the reference index, or for the purpose of short term management of certain cash flows with the intention of reducing tracking error risk. Derivatives will not be used for speculative purposes or to leverage the assets of the fund.

About the investment manager

For more than 60 years VanEck has delivered strategies for investors that provide unequalled access to markets, sectors and investment ideas. VanEck is one of the world's largest issuers of exchange traded funds, managing in excess of US\$100 billion globally for individual and institutional investors. In Australia, VanEck is a pioneer of smart beta strategies and has more than 40 funds listed on the Australian Stock Exchange.

Notes

- Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect investment costs as a percentage of the total average assets of the investment option based on latest available information, but excludes investment performance fee costs that may be charged or incurred by the investment manager and exclude indirect transaction and operational costs (refer to the Product Disclosure Statement for further information about fees and costs).
- Past performance is not an indicator of future performance.
- The administration fee is deducted directly from the investment option before unit prices are declared.
