Generation Life APIR code	ALL3779AU
Investment management cost[4]	0.54% p.a.
Buy/sell spread	0.15%/0.15%
Suggested minimum investment period	5 Years
Risk level	6 - High

Investment objective

Aims to provide long-term tax effective total returns, with diversification across a broad range of Australian companies and industries.

Investment approach

The fund uses a systematic quantitative rules-based approach to build a diversified portfolio by considering factors such as the quality of a company, its growth potential and its implied value relative to its price. The approach considers the tax position of each holding and incorporates additional active investment insights to take advantage of dividends, associated franking credits and other tax effective payments with the aim of delivering an enhanced after-tax return.

Notes

1. Past performance is not an indicator of future performance.
2. S&P/ASX 200 Accumulation Index.
3. Adjusted for Investment management fees and transaction costs.
4. Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect costs as a percentage of the total average assets of the investment option based on latest available information, but excludes investment performance fee costs that may be charged or incurred by the investment manager and exclude indirect transaction and operational costs (refer to the Product Disclosure Statement for further information about fees and costs).

Performance commentary

For the one-month period ending 31 July 2025 the after fee and tax return was 1.56%.

Over July, the constructive progress on US tariffs saw a re-rating of those companies with significant US exposure and at the sector level this benefited primarily Health Care and Information Technology. With the market shifting to a higher growth outlook Consumer Staples lagged the market, with investors shirking the sector in favour of more cyclically exposed areas of the market.

Market commentary

The Australian equity market (S&P/ASX 200 Accumulation Index) returned 2.36% over the month of July 2025.

Consistent with offshore markets, Australian equities rallied over the month with promising progress on trade deals

From a style perspective we saw small-cap stocks outperform large cap. Meanwhile, Value and Quality factors outperformed the broader market whilst Momentum struggled to keep up with the market as investor sentiment shifted.
