Investment objective

To provide a high level of stable monthly income, preserve capital and achieve a gross return of cash plus 4% p.a. over rolling three periods before fees and tax.

Investment approach

The fund invests primarily in senior, secured loans to non-investment grade corporations domiciled primarily in US or Canada with interest rates that float and reset on average approximately every 60 days. The manager's investment approach is a fundamental investment style that is driven by bottom-up credit selection and top-down macro risk positioning tied to broader economic trends. When selecting companies, the manager focuses on those who have capable management teams, consistent and dependable sources of cash flow and reliable collateral packages providing a second source of repayment if required. The underlying investments are managed by multiple offices across the US including New York, and London with supervision and monitoring undertaken by the managers Melbourne office. The manager will use derivatives in the management of the fund to hedge currency exposures but will not use derivatives for gearing purposes or speculative activities. The fund is permitted to borrow and to grant security over its assets. We do not intend to borrow or raise money in connection with the fund for investment purposes but may from time to time borrow for administrative purposes such as to cover timing differences between settlement of sales and purchases of underlying securities, and funding withdrawals.

About the investment manager
