Investment objective

Aims to outperform the investment manager's benchmark (before fees and tax) over 3-year periods by investing in a diversified portfolio of growth and defensive assets.

Investment approach

The benchmark asset allocation has a strong bias to defensive assets and some exposure to growth assets. The investment manager actively looks for opportunities to provide better returns, or less risk, than those generated by the investment manager's benchmark asset allocation and to manage the portfolio's exposure to the risks of investing in markets.
