Investment objective

Aims to achieve a long-term total return (before fees, expenses and tax) that exceeds the MSCI World ex Australia Index, in \$A hedged with net dividends reinvested.

Investment approach

The fund invests in the Walter Scott Global Equity Fund (Underlying Fund), managed by Walter Scott & Partners Limited (Walter Scott). Walter Scott is an independent global investment manager established in 1983, in Edinburgh, Scotland. Walter Scott is a classical, fundamental and long-term growth manager with a wealth of experience in global equity investment. The fund provides exposure to a concentrated portfolio of global equities. The Underlying Fund invests in securities which, in Walter Scott's opinion, offer strong and sustained earnings growth and will not invest in 'tobacco' securities as defined by the Global Industry Classification Standard (GICS®) or 'controversial weapons' securities as defined by MSCI, Inc. The Underlying Fund is actively managed using a benchmark unaware, fundamental, bottom-up and research-driven approach to build a portfolio of strong growth companies capable of generating wealth over long periods of time. The investment approach combines detailed financial analysis with business and management analysis. The portfolio is constructed with a primary focus on stock-based analysis and a bias towards strong growth companies which Walter Scott believes are capable of generating high earnings growth. The fund's exposure to international assets is hedged back to Australian dollars by the manager.

About the investment manager

Macquarie Investment Management Global Limited forms part of Macquarie Asset Management, which is Macquarie Group's asset management business. Macquarie Asset Management is an integrated asset manager across public and private markets offering a diverse range of capabilities including real assets, real estate, credit, and equities and multi-asset.

Notes

1. Investment management costs include investment manager's fees, estimated investment expense recoveries and other indirect investment costs as a percentage of the total average assets of the investment option based on latest information available but excludes indirect transaction and operational costs.
2. Past performance is not an indicator of future performance.
3. The administration fee is deducted directly from the investment option before unit prices are declared.
