- The administration fee is deducted directly from the investment option before unit prices are declared.

Investment objective

The fund aims to provide a long-term capital growth (before fees, costs and tax) that exceeds the MSCI World ex Australia Index, in \$A unhedged with net dividends reinvested through an investment process that fully integrates sustainability considerations.

Investment approach

The fund provides exposure to an actively managed, high-conviction, all-capitalisation global equity strategy. It seeks to invest in companies with exposure to economic tailwinds from the long-term transitions affecting the global economy over the next decade or longer (major demographic, technology, environmental and governance transitions). The fund also implements a sustainable investment approach by seeking to invest in companies that contribute to the achievement of United Nations' Sustainable Development Goals (the 'SDGs') through their products, services and/or practices. The investment strategy relies on an active, fundamental investment process aimed at creating long-term value through a bottom-up approach. Stock selection is based on a deep fundamental analysis of companies combining both financial and sustainability considerations. The fund will seek to invest in companies benefiting from long term growth outlooks and whose stocks present attractive valuation over a medium-term period.

About the investment manager

Mirova is a global sustainable investment specialist offering high-conviction, actively managed equity strategies that integrate environmental, social and governance (ESG) considerations throughout the investment process. The firm focuses on identifying companies that deliver positive solutions to long-term structural challenges while generating competitive financial returns. Mirova applies a rigorous, bottom-up investment approach that combines deep fundamental research with a thematic sustainability lens. Each investment is assessed across financial strength, business model durability, and ESG risks and opportunities, with portfolio construction reflecting strong conviction in companies positioned to benefit from long-term secular trends shaping the global economy.
