## Investment objective

The fund targets a stable return in excess of inflation (before fees and tax) over the medium term.

## Investment approach

The manager is a specialist 'relative value' fixed income investment manager. The manager's differentiated pure 'relative value' investing approach offers a compelling alternative to conventional fixed income investments because it is independent of the prevailing interest rate environment and how bond markets are performing. The manager believes the pure 'relative value' opportunity set is a proven reliable source of returns because it is driven by structural market inefficiencies that create new 'relative value' mispricing opportunities to profit from. The manager focuses on delivering consistent volatility-controlled returns in order to strictly limit performance volatility and prioritise capital preservation, irrespective of the market environment. The manager aims to fully hedge any foreign currency exposure back to the Australian dollar.

## About the investment manager
