Investment objective

Aims to provide a growing income stream by investing in a diversified portfolio of listed real asset securities (such as REITs, infrastructure and utilities) characterised by established physical assets with recurring cash flows.

Investment approach

The manager's approach is premised on the philosophy that high-quality listed real assets can sustain dividends, match rises in the cost of living and are likely to be less volatile than the wider equity market. The manager relies on complementary fundamental and quantitative research, and collective insights into the current investment landscape, to identify the most attractive opportunities. The fund aims to hold approximately 35 securities. The fund may invest up to 20% in real asset securities listed on global developed market exchanges. This limit does not include exposure gained via investments in securities which are dual listed in Australia and global developed market exchanges. The fund does not use derivatives and does not intend to borrow.
