## Investment objective

Aims to provide total returns (income and capital growth) after investment costs and before tax, above the FTSE EPRA/NAREIT Developed Index Hedged in AUD Net Total Return Index on a rolling three-year basis.

## Investment approach

Provides exposure to a diversified portfolio of global listed real estate, primarily real estate investment trusts that are listed, or about to be listed, on exchanges globally, focussing on investments in Europe, the Americas and the Asia Pacific. The fund may also invest in other regions. The manager combines a stock specific (bottom-up) selection process, which has a strong focus on a valuation-based stock selection methodology, with a secondary consideration of macroeconomic (top-down) factors. It seeks to identify and capitalise on investment opportunities through an integrated approach to security-level analysis and macro themes impacting real estate markets. The manager believes that real estate securities supported by a sustainable, well governed, business model and high-quality assets will outperform over the long term. The fund's exposure to international assets is hedged back to Australian dollars.
