Investment objective

Aims to provide a return (before fees, costs and tax) that exceeds the S&P/ASX 200 Accumulation Index over the medium to long term, whilst maximising the portfolio's focus on sustainability.

Investment approach

The fund uses an active stock selection process that combines sustainable and ethical criteria with the managers' financial analysis. The fund aims to invest in companies that the manager has assessed as advancing or having the potential to advance the transition to a more sustainable economy (including companies with business activities that the manager considers have the ability to provide social and/or environmental benefit). In managing the fund, the manager employs exclusionary screens to avoid exposure to companies with business activities that the manager considers to negatively impact the environment and/or society. The manager will not invest in companies directly involved in tobacco production or manufacture or distribution of controversial weapons. Additional exclusionary screens in relation to fossil fuels, uranium, logging, gambling, pornography, weapons, alcohol, tobacco, animal cruelty, predatory lending practices and certain breaches/misconduct are applied differently across industries and business activities.
