Investment objective

The fund aims to provide investors with the performance of the S&P/ASX 20 Accumulation Index (before fees, expenses and tax). The index is designed to measure the performance of the 20 largest Australian securities listed on the ASX.

Investment approach

The fund seeks to achieve its objective by tracking the performance of the S&P/ASX 200 Total Return Index (before fees and tax). The manager believes that a full replication investment strategy is the most appropriate investment strategy to track the performance of the index as risk relative to the index is minimised. The manager's full-replication approach normally aims to purchase every security in the index, while considering transaction costs.
